## Organize All Documents from one interface

Keep track of all documents received. Filter, export, share and download any document requested or simply grant access to a section of your documents within a department or a specific business partner or client

### Integrate and Customize

Export the digitalized documents and the extracted data wherever you want and however you want. Use our event-based API to receive in real-time new processed documents, export the data to CSV. If your software doesn't support API communication, we offer personalized integration through our Bridge Service
